PROFILE

Software Engineering degree candidate graduating in November 2026 with experience in application development, database work, software testing and user training. Completed 24 weeks of industrial training supporting tourism, government and enterprise systems. Contributed to application features, troubleshooting, UAT documentation, data validation and technical handovers. Worked with Python, Ruby on Rails, JavaScript, SQL, Docker and CI/CD, collaborating with developers, data analysts and clients to address system requirements and user feedback.

EDUCATION

Universiti Malaysia Sabah (UMS), Kota Kinabalu **October 2022 - November 2026**
Bachelor of Computer Science with (Hons.) Software Engineering, CGPA: 3.56

Labuan Matriculation College **August 2020 - May 2022**
Certificate in Pure Science, CGPA: 3.79

WORK EXPERIENCE

ST Datablu, Kota Kinabalu, Sabah (On-Site) **March 2026 - August 2026**
Software Development Intern

- Developed password recovery, receipt, master data and role management features for Rural Tourism, connecting backend APIs to frontend interfaces.
- Performed unit, integration and system testing; prepared IDS and RUTEC UAT forms, corrected application issues and supported user briefings and training.
- Assisted with database extraction, Excel data cleaning, pivot-table reporting and master data validation; prepared SQL data quality training exercises for FAMA.
- Configured Docker, MinIO, SMTP and CI/CD for MyJetti Resort; prepared technical handover notes.

Smart Native Maker, Kota Kinabalu, Sabah (Hybrid) **May 2025 - Present**
Freelance Facilitator / Teacher

- Delivered hands-on training using MIT App Inventor, covering mobile app UI design and basic application logic.
- Conducted workshops on Generative AI and prompt engineering using Google Gemini for diverse learner groups.
- Supported training delivery through lesson preparation, participant guidance, and post-session assistance.

Petrosains Sdn Bhd, Kota Kinabalu, Sabah (On-site) **April 2025 - Present**
Volunteer

- Assisted staff with exhibitions, STEM activities, and daily operational support.
- Supported STEM education sessions, including introductory Arduino Uno activities and hands-on learning for children.
- Engaged with visitors and students to facilitate understanding of science and technology concepts.

CERTIFICATIONS AND TRAINING

Professional Agentic AI Engineering (Nexperts Academy) **August 2026**
- Completed training in Python, LLMs, RAG and multi-agent workflows, including FastAPI backends, Docker and CI/CD.

DevSecOps Foundation (PeopleCert) **July 2026**
- Learned DevSecOps principles, CI/CD security and vulnerability scanning with GitHub Actions, OWASP ZAP and Trivy.

Cybersecurity Essentials (Cisco Networking Academy) **January 2026**
- Learned about cyber threats, network security, encryption and data confidentiality, integrity and availability.

Data Analysis (Microsoft Power BI) **July 2025**
- Developed skills in data modelling, visualisation and dashboard creation for analysis and reporting.

Apple Teacher Certification (Apple Education) **May 2025**
- Learned to integrate Apple technologies and digital tools into teaching and learning activities.

CCNAv7: Introduction to Networks (Cisco Networking Academy) **September 2024**
- Gained foundational knowledge of network models, IP addressing and basic network configuration.

HCIA-AI V3.5 Course (Huawei ICT Academy) **July 2024**
- Learned fundamental AI concepts, including machine learning, deep learning and basic AI workflows.

PERSONAL PROJECTS

DevSecOps CI/CD Pipeline
GitHub Actions, Trivy, Semgrep, OWASP ZAP
- Built a CI/CD pipeline combining secret, dependency, container image, static code and dynamic application security scans.
- Configured security gate policies and documented pipeline execution, tool selection and handling of findings.

EcoBook UMS: UMS Eco Campus Booking System
PHP, MySQL, JavaScript, Python, A-Frame
- Developed a web-based booking and management system for UMS Eco Campus services, including reservation records and AR-based virtual exploration.

Smart Fire Alarm System
IoT, sensors, microcontroller programming
- Developed an IoT fire detection prototype integrating sensors, a microcontroller, monitoring and alert functionality.

TECHNICAL SKILLS

Programming: Python, PHP, JavaScript, HTML, CSS, SQL, Ruby on Rails
Databases and data: MySQL, PostgreSQL, DBeaver, Excel data cleaning and pivot tables; basic Power BI
Testing and delivery: Unit, integration and system testing; UAT documentation; Git, GitHub, Docker, CI/CD
Other tools: Figma, MIT App Inventor, IoT sensors and microcontrollers; basic Linux and Cisco Packet Tracer

ACTIVITIES AND INVOLVEMENT

Little Innovators - Transportation Unit Lead **June 2025**
- Led transportation coordination for outreach to remote schools and taught IoT and mBlock through hands-on activities.

U-Science UMS - Facilitator **December 2024 - October 2025**
- Conducted school workshops and guided students through practical IoT and technology activities.
