

MOHAMAD DENISH JUMAD BIN JAMIL

Kota Kinabalu, Sabah | +60 132809762 | denishjumad@gmail.com | www.linkedin.com/in/mdenishjumad

PROFILE

Software Engineering student graduating in 2026 with hands-on experience in full-stack web development, system analysis, UI/UX design, and software architecture. Experienced in developing and enhancing real-world management and government-related digital systems, including MyJetti Semporna, Rural Tourism, RUTEC, ST Care Hub, DOFi, and IDS. Skilled in Ruby on Rails, Python, JavaScript, HTML, CSS, SQL, REST APIs, Docker, CI/CD, Figma, and database design. Experienced in developing backend APIs and frontend modules, implementing authentication and role-based access control, designing ERDs and system architecture, integrating Power BI dashboards, and implementing multilingual functionality using Vue i18n. Also experienced in system testing, UAT/URS documentation, requirement gathering, stakeholder engagement, and technical knowledge transfer. Strong team player with experience collaborating with senior developers, project managers, data analysts, and clients to deliver solutions aligned with business and user requirements.

EDUCATION

Universiti Malaysia Sabah (UMS), Kota Kinabalu	October 2022 - Present
Bachelor of Computer Science with (Hons.) Software Engineering, CGPA: 3.52	
Labuan Matriculation College	August 2020 – May 2022
Certificate in Pure Science, CGPA: 3.79	

CERTIFICATION

HCIA-AI V3.5 Course (Huawei ICT Academy)	July 2024
Learned fundamental AI concepts including machine learning, deep learning, and basic AI workflows.	
CCNAv7: Introduction to Network (Cisco Network Academy)	September 2024
Gained foundational knowledge of computer networking concepts including network models, IP addressing, and basic network configuration.	
Data Analysis (Microsoft Power BI)	July 2025
Developed skills in data modelling, visualisation, and dashboard creation for data-driven analysis and reporting.	
Apple Teacher Certification (Apple Education)	May 2025
Demonstrated proficiency in integrating Apple technologies and digital tools to support teaching, learning, and technology-based education.	
DevSecOps Foundation (PeopleCert)	July 2026
Gained practical knowledge of DevSecOps principles, CI/CD automation, security integration, and the “shift left” approach using tools such as GitHub Actions, OWASP ZAP, and Trivy.	

WORK EXPERIENCE

ST Datablu, Kota Kinabalu, Sabah (On-Site)	March 2026 – August 2026
Software Engineering Intern / Full-Stack Developer Experience	

- Developed and enhanced full-stack web applications, implementing backend APIs, frontend interfaces, database integration, and system modules including authentication, role management, receipts, and reporting.
- Designed responsive UI components and prototypes using CSS and Figma while improving usability across multiple enterprise systems.
- Conducted system analysis, requirement gathering, ERD design, documentation, testing, and stakeholder collaboration for government and enterprise projects.
- Supported data preparation, training material development, and technical documentation for digital transformation projects.

Smart Native Maker, Kota Kinabalu, Sabah (*Hybrid*)

May 2025 - Present

Freelance Facilitator / Teacher

- Delivered hands-on training using MIT App Inventor, covering mobile app UI design and basic application logic.
- Conducted workshops on Generative AI and prompt engineering using Google Gemini for diverse learner groups.
- Supported training delivery through lesson preparation, participant guidance, and post-session assistance.

Petrosains Sdn Bhd, Kota Kinabalu, Sabah (On-site)

April 2025 - Present

Volunteer

- Assisted staff with exhibitions, STEM activities, and daily operational support.
- Supported STEM education sessions, including introductory Arduino Uno activities and hands-on learning for children.
- Engaged with visitors and students to facilitate understanding of science and technology concepts.

PERSONAL PROJECTS

DevSecOps CI/CD Pipeline

GitHub Actions, Trivy, Semgrep, OWASP ZAP

- Designed and implemented an end-to-end DevSecOps pipeline in GitHub Actions that automatically scans every PR and release for leaked secrets, vulnerable dependencies, insecure code, and risky container images before deployment.
- Integrated Trivy (secrets/dependency/image scanning), Semgrep (static analysis for SQL injection, hardcoded keys, missing auth), and OWASP ZAP (dynamic scanning of the running app).
- Defined clear security gates for every finding block, warn-and-track, or accept-and-log, preventing critical vulnerabilities from reaching production.
- Documented the system end-to-end: pipeline walkthrough, run guide, and technical analysis of every tool and policy decision.

EcoBook UMS: UMS Eco Campus Booking System (Final Year Project)

Web-Based System, Python, AR (A-Frame), PHP, MySQL, JavaScript

- Designed and developed a web-based booking and management system for UMS Eco Campus services.
- Implemented real-time data handling and reservation management features.
- Integrated AR-based virtual environment exploration using A-Frame to enhance user experience.

Hijab Tudung E-Commerce Website

PHP, MySQL, HTML, CSS, JavaScript

- Developed a web-based e-commerce platform for purchasing hijabs.
- Implemented product listings, basic cart functionality, and order management.
- Designed responsive user interfaces for improved usability.

Employee Leave Management System

Mobile Application, Kotlin, SQLite, Android Studio

- Developed a mobile application to manage employee leave applications and approvals.
- Implemented leave request tracking and approval workflow management.
- Stored and managed records using a local SQLite database.

The Strangers Encounter Part 3 – AR Colouring Book

AR, Unity, Interaction Design, C#

- Developed an AR colouring book application with interactive storytelling elements.
- Implemented AR interactions to enhance user engagement.
- Designed intuitive interaction flows for a child-friendly experience.

Kokol Mamahill: Campsite Management System

Web Application, PHP, MySQL, HTML, CSS

- Developed a web-based campsite booking and reservation management system.
- Implemented booking records and availability management features.
- Designed a simple and functional user interface for administrators and users.

Smart Fire Alarm System

IoT, Sensors, Microcontroller, Real-Time Monitoring

- Developed an IoT-based fire alarm system for early fire detection.
- Integrated sensors and microcontrollers for real-time monitoring.
- Implemented alert mechanisms to notify users of potential fire hazards.

TECHNICAL SKILLS

Advanced

HTML, CSS, PHP, IoT Sensor Integration, Microcontroller Programming, Data Visualisation

Intermediate

Python, JavaScript, MySQL, Database Design, UI/UX Design, MIT App Inventor, Figma, Java, C++ , Scratch ,

Basic

C#, Microsoft Excel, Power BI, AR/VR Development, SQLite, Cisco Packet Tracer, Android Studio, Linux, Eclipse, Huawei Cloud, Unity, Dbeaver, Ruby on Rails

ACTIVITIES AND INVOLVEMENT

TechTrek Hackathon – Participant

December 2025

- Participated in a university-level hackathon focused on technology innovation and problem-solving.
- Practiced collaborative project development and rapid prototyping skills.

Little Innovators – Ketua Unit Pengangkutan

Jun 2025

- Led the transportation unit for outreach programs to remote schools.
- Taught students IoT and mBlock concepts through hands-on activities.
- Assisted in designing learning materials and visual aids using Figma.

U-Science UMS – Facilitator

December 2024 – October 2025

- Conducted multiple workshops in schools to teach IoT and basic technology concepts.
- Guided students through practical sessions, fostering engagement and problem-solving skills.

- Acted as liaison between the club and corporate partners.
- Coordinated communications and assisted in corporate engagement activities.

Program Simbes – Participant

November 2024

- Engaged in team-based activities and workshops to enhance technical and teamwork skills.

Pesta Buku Mini – Unit Urusetia

May 2025

- Managed event registration, nametag design, and logistics coordination.
- Supported overall event operations to ensure smooth execution.
